Using Two-Step Verification with VPN

On September 28, VPN will require two-step verification.

After activating two-step verification, you will use a new username, your HarvardKey, and a two-step verification code to connect.

For assistance, contact the HUIT Service Desk at ithelp@harvard.edu or 617-495-7777.

1. Get started
   - Open the Cisco AnyConnect client and enter the following address: vpn.harvard.edu
   - Click “Connect”

2. Enter your new username
   Your HUID is automatically populated in the username field. It may be followed by “@name”.
   - Replace your HUID with your Harvard email address.
   - If you have an “@name”, replace the “@” with a “#”
   - Password: Enter your HarvardKey

3. Enter a two-step verification code
   - Tap the Duo mobile app icon on your smartphone or tablet
   - Tap the key icon
   - Type the code into the Two-Step Verification Code field
   - Click OK
